

Empower your patients in their care

Quil Engage is a transformative patient engagement platform that makes the patient care journey more individualized and supportive at every stage. Borrowing from the powerful techniques and practices of the entertainment industry, our Engagement Engine activates and educates patients with compelling, relevant content throughout their care journey while giving the care team real-time insights to drive necessary interventions. We help to make sure patients are engaged in their journey on the right device, for the right task, at the right time.

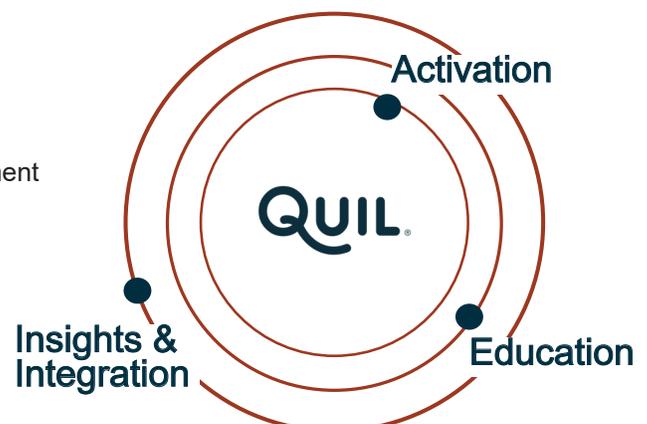

Why engagement matters

Simply put, engaged patients are healthier patients and healthier patients have better outcomes. A recent study conducted in collaboration with our partners at Penn Medicine found that improved engagement and meaningful educational content leads to:

- ✔ Increased patient literacy, adherence and confidence
- ✔ Improved staff efficiency
- ✔ Reduced length of stay, complications and readmissions
- ✔ Decreased operational costs

The Quil Engagement Equation

Quil has proven that when patients are informed, inspired and empowered, their outcomes are better. Quil developed an approach to care journeys that focuses on actionable engagement from all stakeholders within the care journey — care teams, patients, and their loved ones. Quil Engage makes use of three pillars to support this care journey approach: Activation, Education, Insights and Integration.

How Quil Engage empowers patients, supports care teams, and creates positive healthcare experiences:

Quil Engage’s combination of education and activation, along with clinical team partnerships, helps patients navigate their health experience, associated with better self-care at home and improved outcomes.

Patients & Loved Ones

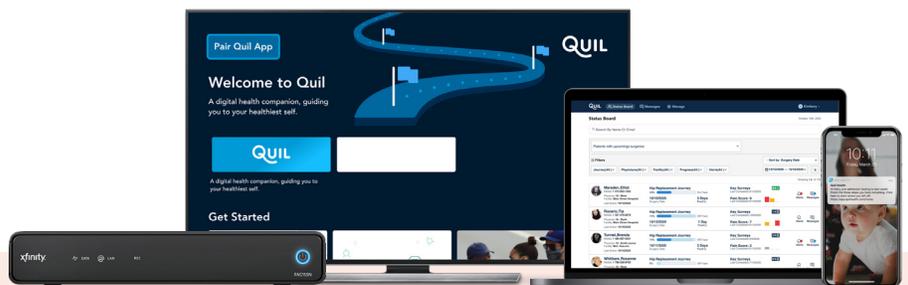

Quil Engage provides individualized care journeys that deliver the right content to the right patient at the right time, across any device or channel.

- ✓ Ensure trusted information is available exactly where and when it’s needed
- ✓ Reinforce best practice standards of care to patients and families in partnership with their loved ones and clinical teams
- ✓ Send automated check-ins and reminders to keep patients on track
- ✓ Navigation to recommended resources within the health care system to better support transitions and potential gaps in care

Clinical Teams

Quil gives clinical teams access to real-time patient feedback, integrated directly into the clinical workflow, improving efficiency and generating more actionable insights into patient status.

- ✓ Support clinical decision-making with real-time access to Quil-collected data
- ✓ Increase clinical staff efficiency by saving time in helping patients and families prepare for care events
- ✓ Triage at-risk patients and quickly understand when intervention is necessary

About Quil:

WE HELP PEOPLE ORGANIZE AND NAVIGATE THEIR HEALTH LIVES

Quil, a joint venture of Independence Health Group (Independence) and Comcast, is a digital health platform that offers personalized and interactive health journeys to consumers and their caregivers. Quil believes that patient education and engagement lead to better outcomes at a lower cost. Quil serves patients, members, and their caregivers, and is partnered with healthcare providers and health plans nationally. We are headquartered in Philadelphia, PA.
